

HOW TO TALK ISRAEL ON SOCIAL MEDIA

An exclusive TalkIsrael workshop

TalkIsrael is a nonprofit that aims to create a positive and constructive dialogue about Israel among American teens using the power of social media.

We believe that young people have the power to shape the narrative about Israel. Our mission is to empower them to engage in thoughtful and informed content creation and discussions about Israel online by equipping them with the knowledge and tools they need through our programs and original content.

During our exclusive “How to Talk Israel on Social Media” workshop, students will learn the art of creating and sharing authentic and inspiring Israel-related content on social media and receive tools to amplify positive narratives about Israel online. Participants will get the opportunity to experience the power of personal storytelling, practice their content creation skills, and join TalkIsrael’s community of creators.

The workshop is suitable for students at every level of social media proficiency and is available online and in-person.
